

## Aunt Flow Dispensers - ADA Specification Guidelines

Aunt Flow is here to support your dispenser installation process! It's important to ensure that the hardware in your bathrooms is installed properly, following ADA (The Americans with Disabilities Act) guidelines. Below, we've outlined important reminders for ADA-compliant installation.

### Dispenser Installation Specifications:

- Placing dispenser 1.5" - 2" below the grab bar or no more than 12" above bar in handicap stall
- Operable part to be no more than 15" - 48" from the floor
- Dispenser must not exceed 4" from the wall in a passageway

### Avoid Installing Your Dispenser:

- Above an electrical outlet
- Adjacent to light switch
- Next to a mirror
- Over or close proximity to a hand air dryer
- Close proximity to a door

### Wall Surface Recommendations:

- Avoid mounting on tile if possible
  - If necessary, try to position screws in grout lines
- Sheetrock or paneling
  - Minimally insert screws into one stud

### Aunt Flow Dispenser Specifications for Inclusivity:

- Buttons for Dispensing
  - No turn-knobs, ensuring wrist mobility is not needed to operate
  - Activate buttons with less than 4lbs of pressure
- Language inclusivity
  - All dispensers include English, Spanish, and Braille
